

• produção de isonitrilas

• Reação Halofórmica

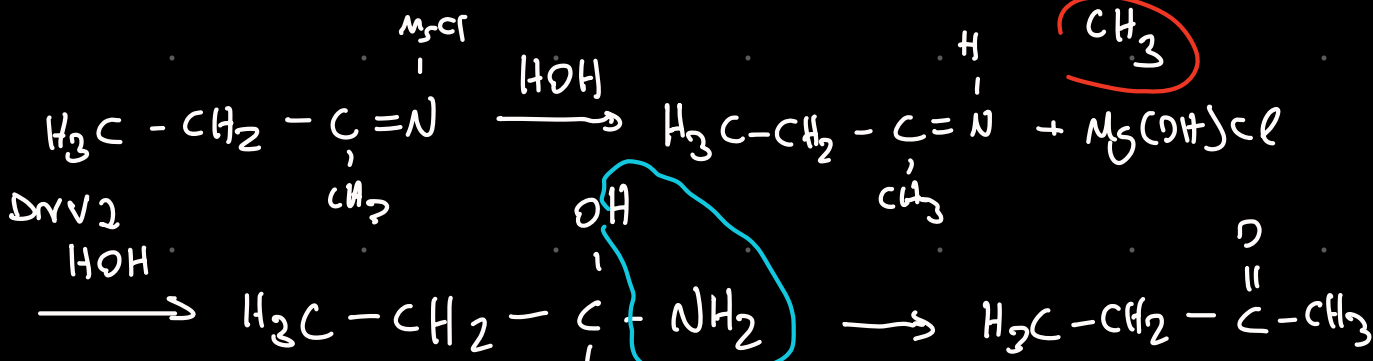

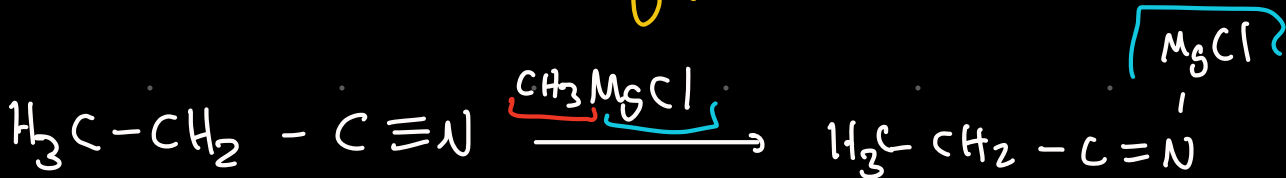

Também pode fazer assim

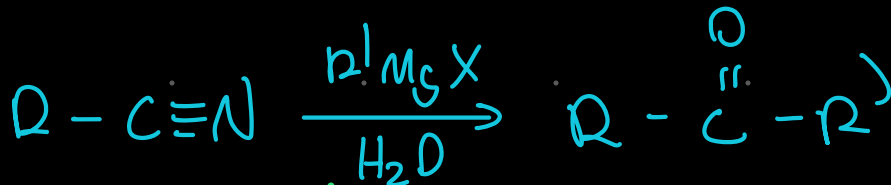

↓
Isonitrila

Nitrilas com Grignard

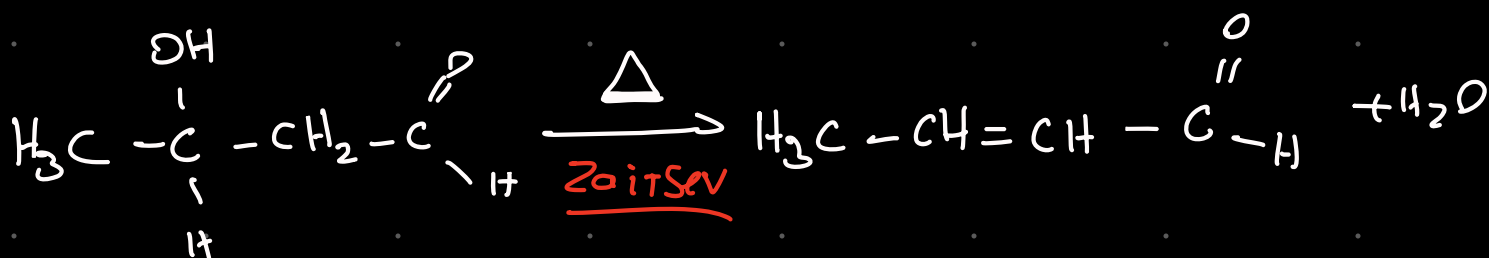

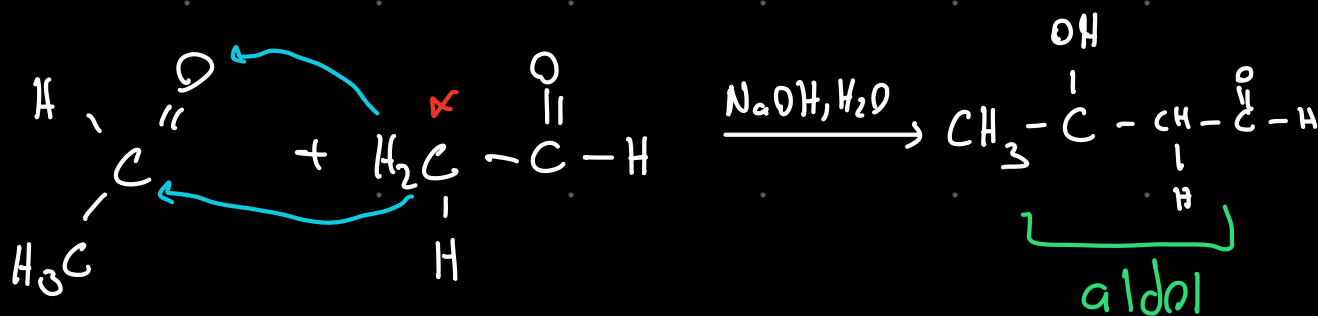

Tipo
Diol geminal

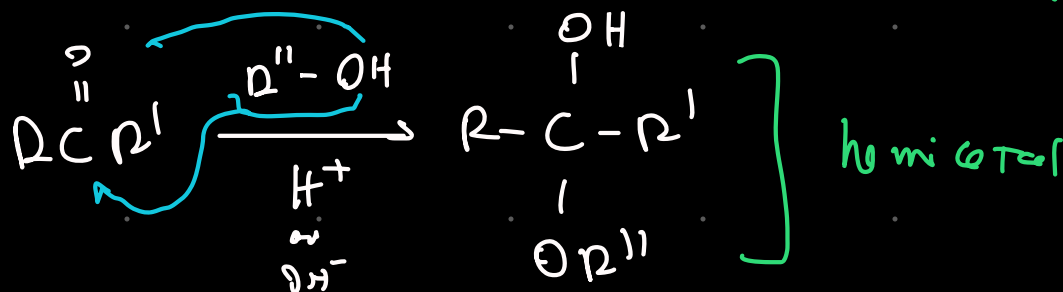

primeira Grignard sem a água sendo grupo Grignard

• Condensação Aldólica (difícil cair)

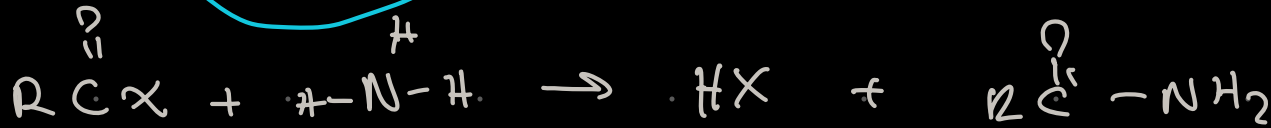

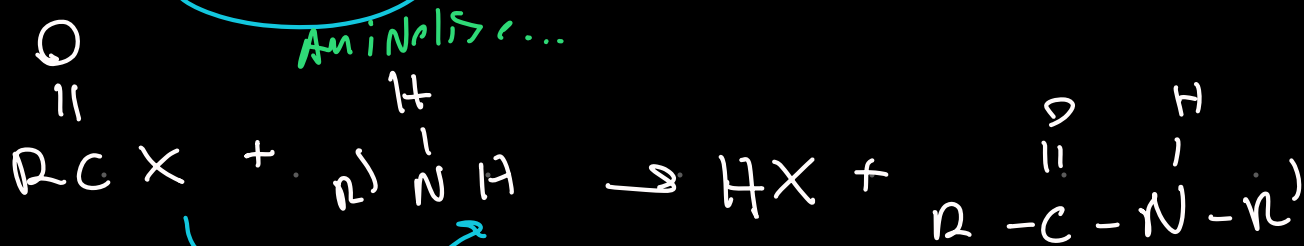

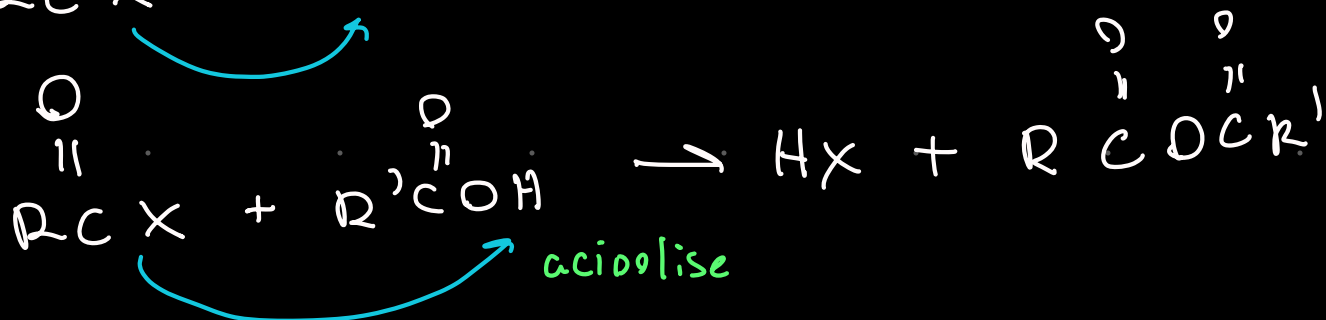

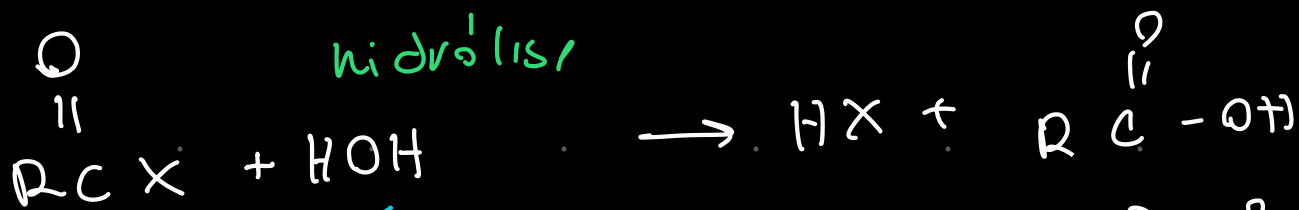

• Hemiacetais (semi-etais) Não vai cair por ressonância

↓ outro álcool
pequeno água

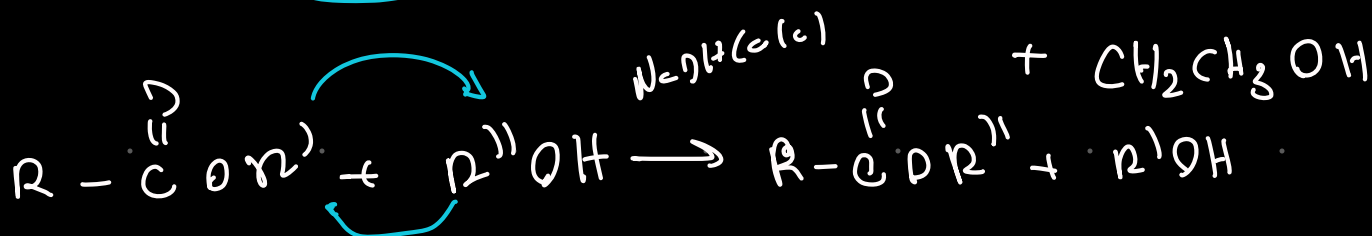

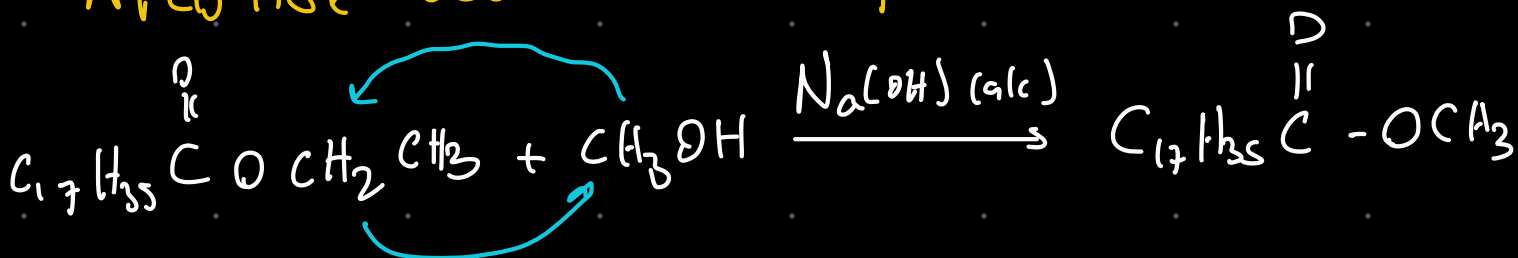

Cetal

• Listas de Reações de Ácidos

Só precisar ter hidrogênio (preferência por eletronegatividade)

• Alcolólise ou transesterificação

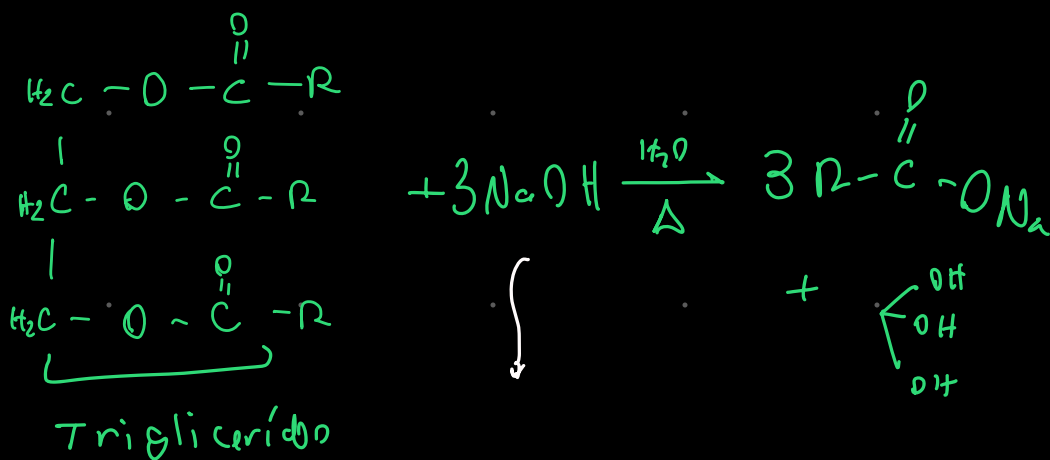

Ésteres

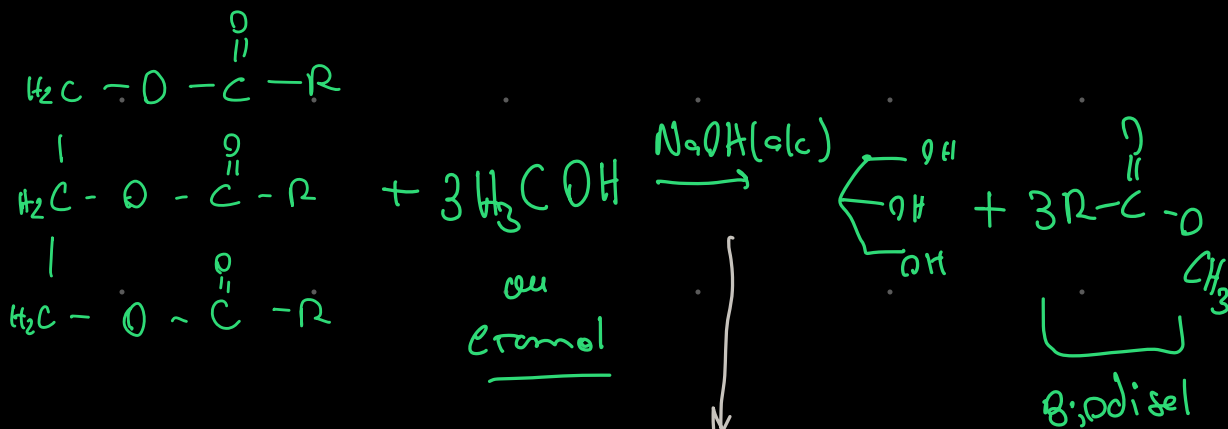

Na OH (saponificação) (hidrólise Básica)

R'' OH alcoolise

↑
Gordura

meio anidro

se não

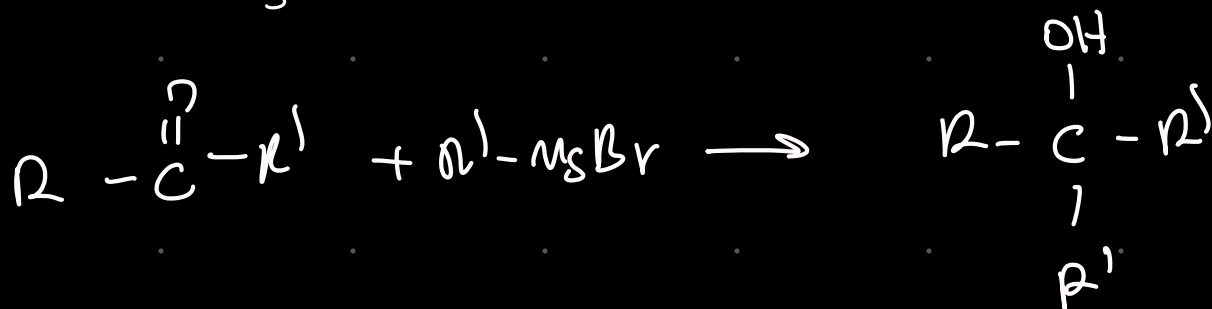

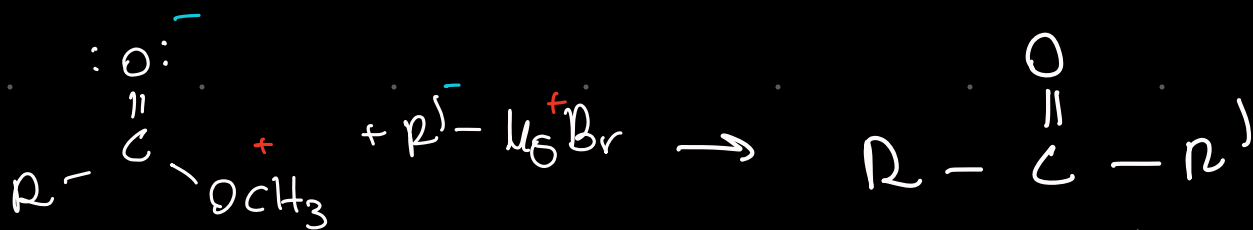

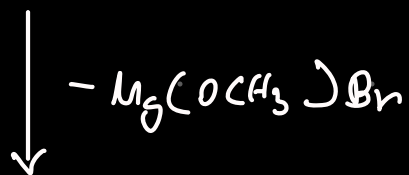

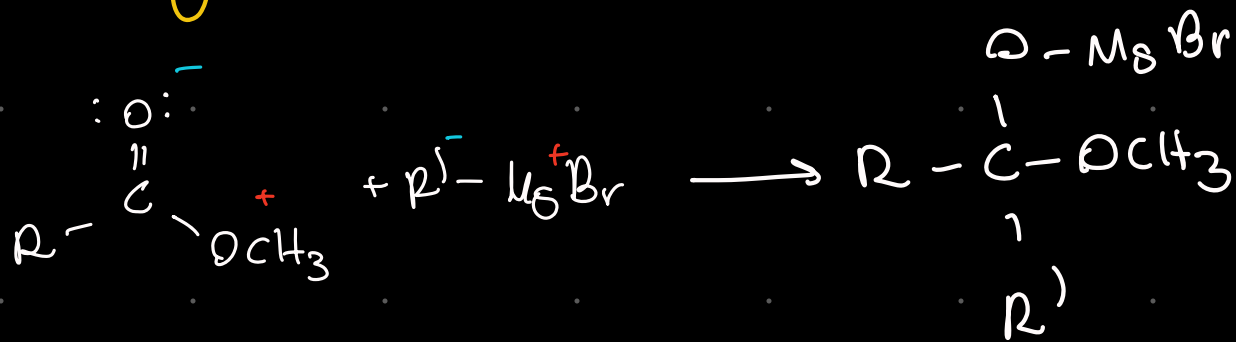

Forma Sabão

e ele emulsifica as duas fases

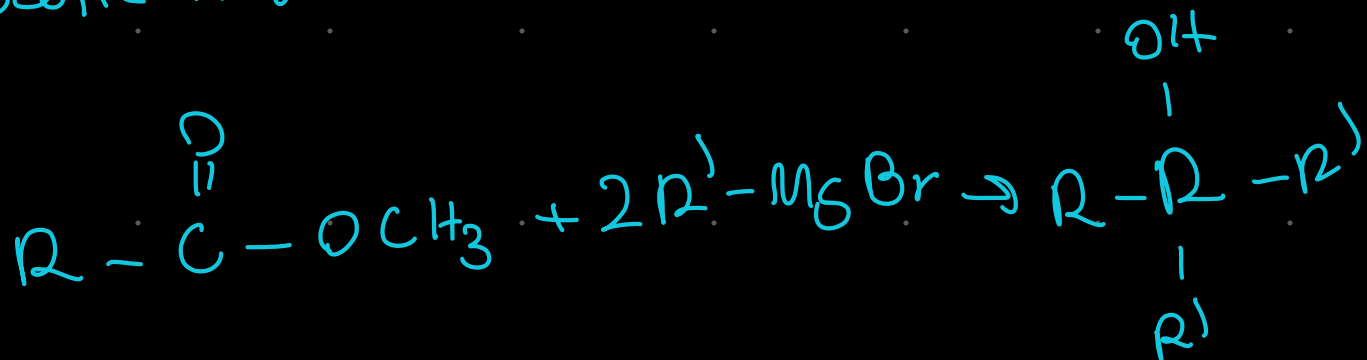

menos denso

fica em cima.

Grignard com éster

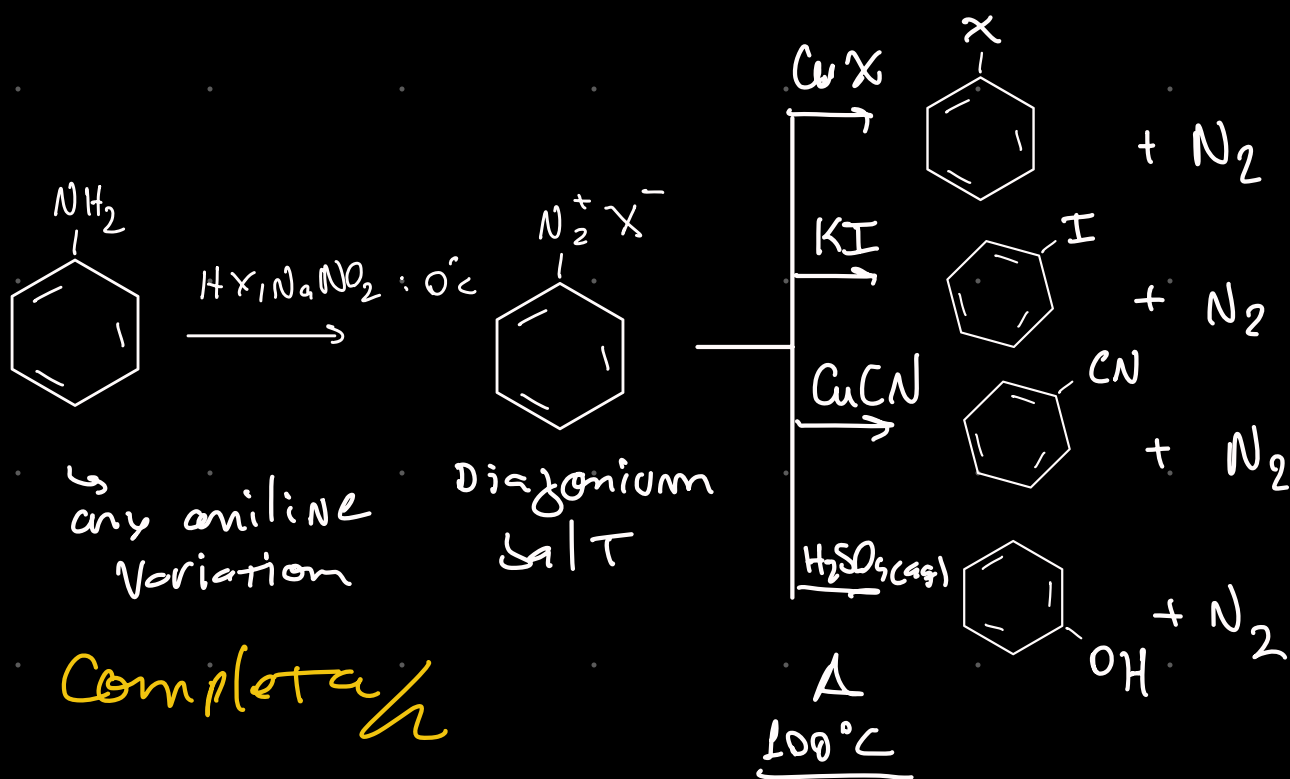

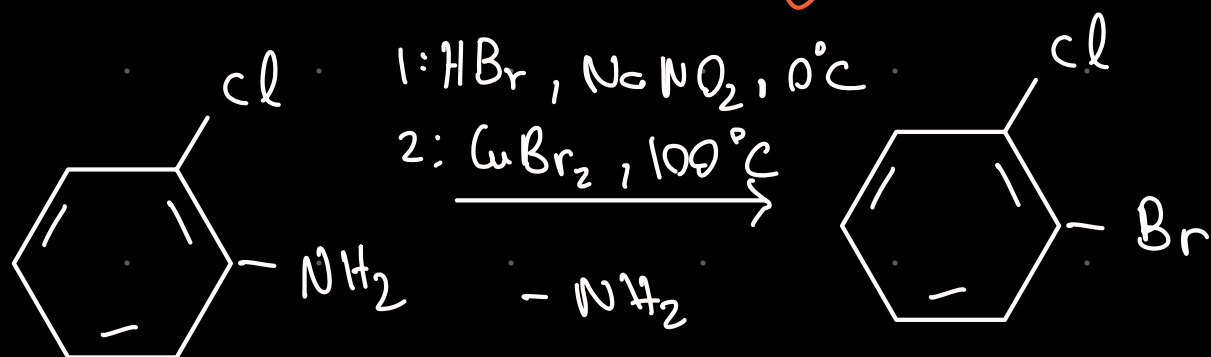

Baricouret

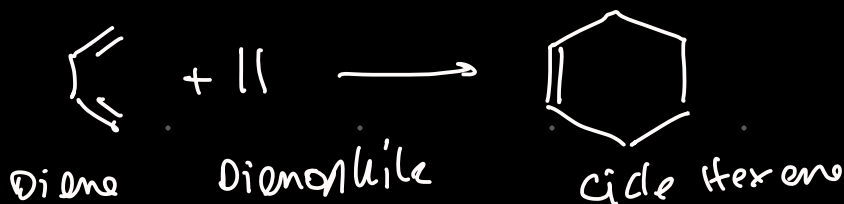

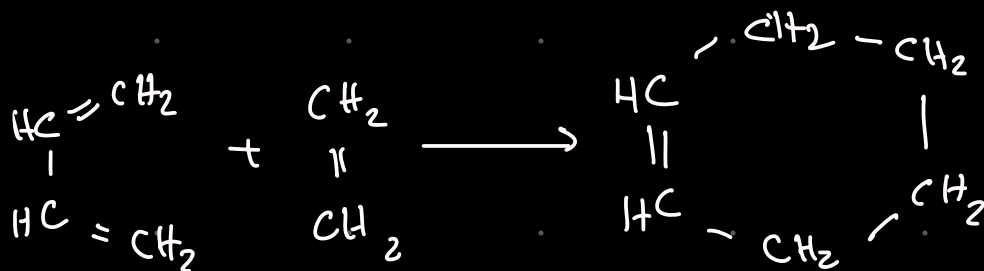

Reação de Sandmeyer

simplified

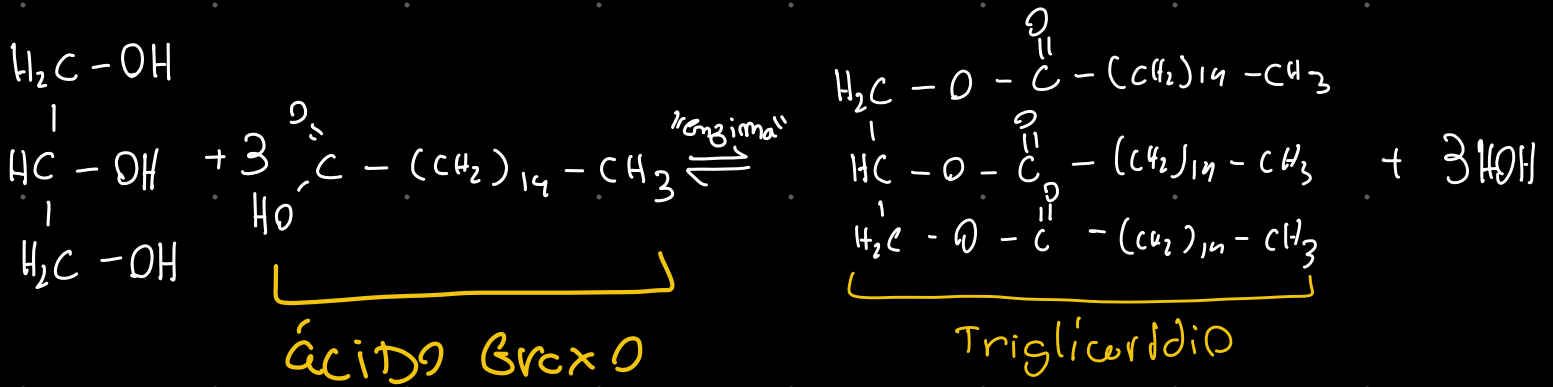

Reação de Diels - Alder

Extra

Glicerina + Ácido Palmítico

Palmítico

TriPalmitato de Glicerila
